ECOLOGICAL COMMITMENT

PORCELANOSA^{eco}

The care and conservation of the environment has always been one of Porcelanosa's major concerns. Porcelanosa's environmental strategy goes far beyond the optimization of production systems; Examples of this include faucets that limit water flow or building solutions that allow for energy saving in their heating systems.

Many of the products manufactured by Porcelanosa have distinct ecological features. Flooring using over 95% recycled material, kitchen and bathroom worktops with KRION® K-Life, which help purify air, faucets with aerators, double-flush system toilets, with which you can save up to 89% water, and ventilated facade systems, which reduce air conditioning costs and allow you to save more than 30% on energy bills.

30%

of energy consumed
by Porcelanosa is
generated by its own
facilities to promote
energy efficiency.

Porcelanosa has
repopulated
a forest area with

10,400

trees.

100%

of water volume
is recycled through
our 5 wastewater
treatment plants.

A modern kitchen and dining area featuring a large island with a black marble countertop and a wooden breakfast bar. The kitchen cabinets are dark wood, and the island has a built-in sink and cooktop. A long, linear pendant light fixture hangs over the island. In the foreground, a dining table with a wooden top and black legs is set with plates, glasses, and a centerpiece. Four black chairs are tucked under the table. In the background, a wine rack is visible, and a large window with a black frame and horizontal slats allows natural light into the space. A portion of a beige sofa is visible in the bottom right corner.
