ECOLOGICAL COMMITMENT

The care and conservation of the environment has always been one of Porcelanosa's major concerns. Porcelanosa's environmental strategy goes far beyond the optimization of production systems; Examples of this include faucets that limit water flow or building solutions that allow for energy saving in their heating systems.

Many of the products manufactured by Porcelanosa have distinct ecological features - flooring using over 95% recycled material, kitchen and bathroom worktops with Krypton® K-Life, which help purify air, faucets with aerators, double-flush system toilets, with which you can save up to 89% water, and ventilated facade systems, which reduce air conditioning costs and allow you to save more than 30% on energy bills.
